

OUR CLIENTS Education

Operable Window Technologies has the privilege of assisting many schools, preschools and tertiary institutions, with their high level window opening requirements.

Below is a list of some of our clients in the education sector. The work we have completed for them ranges from new construction to refurbishments, and involves the supply & installation of window controls, including manual gearbox operated shaft & lever, electric shaft & lever, discreet chain drives, and even gearing that is fully integrated with a BMS.

We understand the specific requirements of these organisations and work around these, completing work both inside & outside school hours.
